## SUMMARY

Seeking Challenges role at a renowned IT organization would enable me to contribute to the Company's growth and enhance my skills by exploring new ideas.

## EXPERIENCE

### Programmer

**Samarthan System Pvt Ltd**

📅 06/2019 - 07/2020

- Familiar in development with algorithm and checking of completed programs by running simulations
- +1 experience on software and Robot Programming
- Worked closely with clients to establish specifications and system designs and their requirements. Work on different software as per client needs.

## SKILLS

Core Java	Maven	Spring Boot	Restful API	JSP	
Microservice	React Js	Node Js	HTML	CSS	Tailwind
SQL/MySQL	MongoDB	ASP.NET	javaScript		

## ACADEMIC PROJECTS

### ONLINE BOOK STORE

📅 06/2022 - 11/2022

MS.NET

During my PG diploma for my final project, I worked on Online Book Store an ECommerce .net application that can be used to view books, browse through different genres of books, view information about authors and book series And also suggest books depending on your interest in the book and author. The administrator portal of this application can be used to add book and author information to the database. For the deployment of the project, I used the Microsoft Azure platform.

### HYBRID SOLAR TRACKING

📅 01/2018 - 06/2018

C++

*This Project is about tracking the sun so that solar panels can bring out the maximum output from the sun. We used a method that does not require any sensors to track the sun instead we used an algorithm to track it. For that we use Arduino and Software called Arduino IDE which uses C++ Programming. We take reading at different angles using the single main panel and point other solar panels to the angle where we received the highest reading. We save that data throughout the year and we use it when the weather is cloudy.*

## LANGUAGES

English	Advanced	Hindi	Native
Marathi	Native		

## EDUCATION

### Post Graduate Diploma in Advanced Computing (PG-DAC)

GPA  
**6.9** / 10

**Knowledge Park, Bangalore**

📅 03/2022 - 11/2022

### B,E in Electronics and Telecommunication Engineering

GPA  
**6.51** / 10

**Sant Gadge baba Amravati University**

📅 2014 - 2018

## PORTFOLIO

### React Js + Java

Java is used for the backend and for the front we used ReactJs. it perform basic CRUD operation and mapped the rest of Api using Axios in react.

**Skills : ReactJs, Spring Boot, Java, Maven, JavaScript, MySQL.**

### NetFlex Clone

It was designed on ReactJs and for Styling we used Tailwind. For the backend, we have used TMDB API using Axios and deployed it using netlify.

**Skills : ReactJs, Tailwind, JavaScript**

### Dashboard Analysis App

MERN Stack is used to create this application. Data is taken from a Json file and represented this data in a simple form like charts for easier understanding. Use sync fusion for representing data in table form and added different filter functions on given data.

**Skills : ReactJs, JavaScript, MongoDB, Chart Js.**

### Smart Contact Manager

This application was developed on Eclipse 2019 Java 8 version. Spring Boot Maven was used for Back and for the front,JSP with thyme leaf to make the front end easier. It's a project which lets you create the user and save its contact with profile photos and you can also edit and update it. We have used Spring Security for login operation and B crypt to keep the user password encrypted.

**Skills : JSP, Spring Boot, Java, Maven, JavaScript, MySQL.**

### Hotel Review and Rating

This contains only the Backend. In this, we use microservices to make the project easier to understand.

**Skills : Spring Boot, Java, Maven, JavaScript, MySQL, Okta, Eureka, API Gateway.**
